Project planning tool for SIMATIC STEP7 available for download

Time-consuming and costly startup procedures are now a thing of the past: SEW-EURODRIVE provides sample programs in the Internet free of charge. These programs make project planning, programming, diagnostics and communication with the programmable logic controller SIMATIC STEP7 user-friendly and reliable.

Practical sample programs enable components to be integrated easily in an existing SIMATIC S7 system:

- S7 sample control program for decentralized installation: MOVIMOT® gearmotors with integrated frequency inverter and MFP PROFIBUS interface
- S7 sample control program for MOVITRAC® B frequency inverters via DFP21B gateway
- S7 sample control program for MOVIDRIVE® drive inverters:
 - “Extended positioning via bus” application module
- S7 sample control program “Single-axis positioning” for MOVIAXIS® multi-axis servo inverters
- S7 sample module for operating the DP-V1 parameter channel of the MOVIDRIVE®, MOVITRAC® B, MOVIFIT® classic and MOVIAXIS® unit series.

Download from www.sew-eurodrive.com:

- Uncoded program modules that can be adapted quickly and easily to suit specific applications
- Available in German and English
