MOVIFIT® Function Level "Technology"
with DeviceNet Interface
Additional Information for Firmware Version 10
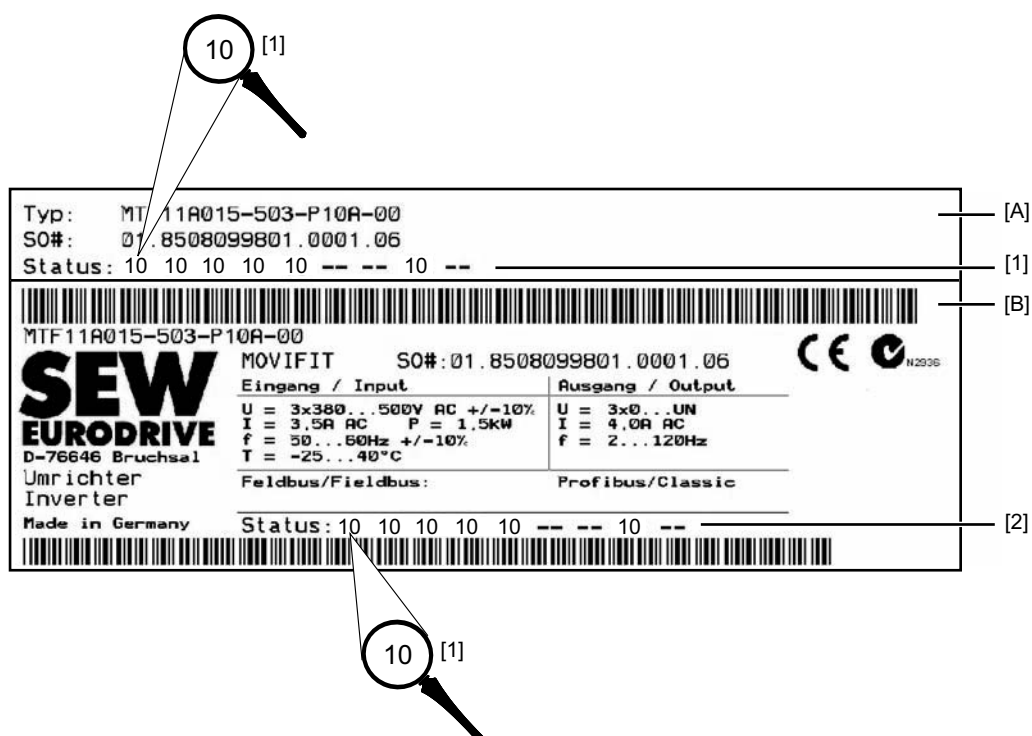

Edition 03/2009

Manual

1 Additional Information for Firmware Version 10
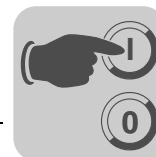

1.1 *Other applicable documentation*

- This document does not replace the detailed manual.

- Installation and startup only by trained personnel observing the relevant accident prevention regulations and the following manual:

    – "MOVIFIT® Function Level "Technology" with DeviceNet Interface" manual

1.2 *Identification of firmware version 10*

[A]	External nameplate	1668875019
[B]	Internal nameplate	
[1]	Firmware version 10	
[2]	EBOX status field	

1.3   *Changes compared to the standard firmware*

Firmware version 10 of MOVIFIT® function level "Technology" provides a different functionality compared to that described in the manual mentioned above:

- The "Transparent mode" application module does not support the MOVIFIT® slave units.

  None of the corresponding functions with MOVIFIT® slave units are available.

- As opposed to MOVIFIT® function level "Classic", the LEDs of MOVIFIT® function level "Technology" do <u>not</u> indicate the status of the communication with the lower-level devices (MOVIMOT® connected to MOVIFIT®-MC or integrated power sections in MOVIFIT®-FC or MOVIFIT®-SC).

1.4   *New installation of transparent mode application module*

Proceed as follows to install the transparent mode application module on the MOVIFIT® if it has been deleted:

Prerequisite:

The following software is installed on the PC:

- MOVITOOLS® MotionStudio 5.5 Complete, incl. Service Pack 3

  and "Transparent mode version manager" add-in

- or MOVITOOLS® MotionStudio 5.6 Complete

1. Start the MOVITOOLS® MotionStudio software.
2. Right-click on "0: MT. ...D11A" and select [Programming] / [Version manager] from the menu.

   The "Version manager" window opens.
3. Select the firmware version with gateway application and confirm by clicking on the [Next] button.
4. Click on [Next] until the function selection is displayed.
5. Activate the "Download gateway application" checkbox.
6. Click the [Finish] button.
