Revision

MOVIFIT®-FC

Special Design Dual-Motor Operation

1 Unit Structure

INFORMATION

This addendum describes corrections to the "MOVIFIT® FC Special Design for Dual-Motor Operation" operating instructions. Please observe the corrections made here. This document does not replace the detailed documentation.

1.1 Special design "MOVIFIT® FC for dual-motor operation"

INFORMATION

This special design "MTA...-S...-30." comprises the following changes to the connection box compared to the standard design:

- Integrated K1/K2/K3 relay for switching between drive 1 and drive 2. The relays have a service life of **3,000,000 switching cycles**. The relays have to be replaced after that.
 - All additional notes in the addendum to the "MOVIFIT® FC Special Design for Dual-Motor Operation" continue to apply.
-
