Catalog

DRE Gearmotors (IE2)

Edition 09/2009
Content

1 Preface ............................................................................................................................... 6
2 Product Description .......................................................................................................... 10
3 Unit Designations and Variants ......................................................................................... 18
4 Project Planning for Drives .............................................................................................. 35
5 Project Planning for Gear Units ......................................................................................... 39
6 Mounting Positions and Important Order Information ................................................. 54
7 Design and Operating Notes ............................................................................................ 86
8 Important Information about Tables and Dimension Sheets ....................................... 128
9 Helical Gearmotors ........................................................................................................ 135
10 Parallel-Shaft Helical Gearmotors ................................................................................ 281
11 Helical-Bevel Gearmotors ............................................................................................. 405
12 Helical-Worm Gearmotors ............................................................................................ 529
13 Spiroplan® Gearmotors ................................................................................................. 631
14 AC Brakemotors – Technical Data .................................................................................. 667
15 Abbreviation Key and Index ......................................................................................... 687
# Preface
The SEW-EURODRIVE group of companies

1.1 Products and systems from SEW-EURODRIVE .......................... 6
1.2 Additional documentation .......................................................... 9

# Product Description
General notes on the product description

2.1 Corrosion and surface protection ................................................. 10
2.2 Extended storage ........................................................................ 14
2.3 Condition monitoring: Oil aging and vibration sensor ................. 16

# Unit Designations and Variants
Unit designations for AC motors and options

3.1 Gear unit and options – unit designations .................................... 18
3.2 Unit designations for AC motors and options ......................... 21
3.3 Sample unit designation for a DR gearmotor .......................... 25
3.4 Gearmotor variants ..................................................................... 26

# Project Planning for Drives
Drive selection data

4.1 Additional documentation ........................................................... 35
4.2 Drive selection data ................................................................. 36
4.3 Project planning procedure ....................................................... 37

# Project Planning for Gear Units
Efficiency of SEW gear units

5.1 Efficiency of SEW gear units .................................................... 39
5.2 Oil expansion tank .................................................................... 41
5.3 Multi-stage gearmotors ......................................................... 42
5.4 Service factor .......................................................................... 43
5.5 Overhung and axial loads ....................................................... 46
5.6 RM gear units ........................................................................... 50
5.7 Condition monitoring: Oil aging and vibration sensor ............ 53

# Mounting Positions and Important Order Information
General information regarding the mounting positions

6.1 General information regarding the mounting positions .......... 54
6.2 Important order information ..................................................... 55
6.3 Key to the mounting position sheets ....................................... 59
6.4 Helical gearmotors – mounting positions ................................. 60
6.5 Parallel-shaft helical gearmotors – mounting positions ............ 65
6.6 Helical-bevel gearmotors – mounting positions ................. 68
6.7 Helical-worm gearmotors – mounting positions ..................... 73
6.8 Spiroplan® gearmotors – mounting positions ....................... 79
6.9 AC motor – mounting position designations ......................... 85

# Design and Operating Notes
Lubricants

7.1 Lubricants .............................................................................. 86
7.2 Reduced backlash gear units ................................................... 94
7.3 Installation/removal of gear units with hollow shafts and keys ... 95
7.4 Gear units with hollow shaft .................................................. 100
7.5 TorqLOC® mounting system for gear units with hollow shaft ... 101
7.6 Shouldered hollow shaft with shrink disk option ................. 103
7.7 Adapters for mounting IEC motors ....................................... 110
7.8 Adapters for mounting NEMA motors ................................. 113
7.9 Adapters for mounting servomotors ...................................... 115
7.10 Fastening the gear unit ......................................................... 118
7.11 Torque arms .......................................................................... 118
7.12 Flange contours of RF.. and R..F gear units ......................... 119
7.13 Flange contours of FF.., KF.., SF.. and WF.. gear units .......... 120
7.14 Flange contours of FAF.., KAF.., SAF.. and WAF.. gear units .... 121
7.15 Fixed covers .......................................................................... 122
7.16 Condition monitoring: Oil aging and vibration sensor ....... 124

# Important Information about Tables and Dimension Sheets
Geometrically possible combinations

8.1 Geometrically possible combinations ....................................... 128
8.2 Selection tables for gearmotors ............................................. 129
8.3 Information regarding the dimension sheets ......................... 131
Preface

The SEW-EURODRIVE group of companies

1.1 The SEW-EURODRIVE group of companies

Global presence

Driving the world with innovative drive solutions for all branches and for every application. Products and systems from SEW-EURODRIVE are used in a multitude of applications worldwide. These include the automotive, building materials, food and beverage as well as metal-processing industries. The decision to use drive technology made by SEW-EURODRIVE stands for reliability regarding both, functionality and investment.

We are represented in the most important branches of industry all over the world: with 12 manufacturing plants, 67 assembly plants in 47 countries and our comprehensive range of services, which we consider an integrative service that continues our commitment to outstanding quality.

Always the right drive

The SEW-EURODRIVE modular concept offers millions of combinations. This wide selection enables you to choose the correct drive for all applications, each based on the required speed and torque range, space available and the ambient conditions. Gear units and gearmotors offering a unique and finely tuned performance range and the best economic prerequisites to face your drive challenges.

The gearmotors are powered by MOVITRAC® frequency inverters, MOVIDRIVE® inverters and MOVIAXIS® multi-axis servo inverters, a combination that blends perfectly with the existing SEW-EURODRIVE program. As in the case for mechanical systems, the development, production and assembly is also carried out completely by SEW-EURODRIVE. In combination with our drive electronics, these drives will provide the utmost in flexibility.

Products of the servo drive system, such as low backlash servo gear units, compact servomotors or MOVIAXIS® multi-axis servo inverters provide precision and dynamics. From single-axis or multi-axis applications all the way to synchronized process sequences, servo drive systems by SEW-EURODRIVE offer a flexible and customized implementation of your application.

For economical, decentralized installations, SEW-EURODRIVE offers components from its decentralized drive system, such as MOVIMOT®, the gearmotor with integrated frequency inverter or MOVI-SWITCH®, the gearmotor with integrated switching and protection function. SEW-EURODRIVE hybrid cables have been designed specifically to ensure cost-effective solutions, independent of the philosophy behind or the size of the system. The latest developments from SEW-EURODRIVE: MOVITRANS® - system components for contactless energy transfer, MOVIPRO® - the decentralized drive control and MOVIFIT® - the new decentralized intelligence.

Power, quality and sturdy design combined in one standard product: With high torque levels, industrial gear units from SEW-EURODRIVE realize major movements. The modular concept will once again provide optimum adaptation of industrial gear units to meet a wide range of different applications.

Your ideal partner

Its global presence, extensive product range and broad spectrum of services make SEW-EURODRIVE the ideal partner for the machinery and plant construction industry when it comes to providing drive systems for demanding applications in all branches of industries and applications.
1.2 **Products and systems from SEW-EURODRIVE**

The products and systems from SEW-EURODRIVE are divided into 4 product groups. These 4 product groups are:

1. Gearmotors and frequency inverters
2. Servo drive systems
3. Decentralized drive systems
4. Industrial gear units

Products and systems used in several group applications are listed in a separate group "Products and systems covering several product groups". Consult the following tables to locate the products and systems included in the respective product group:

### 1. Gearmotors and frequency inverters

<table>
<thead>
<tr>
<th>Gear units/gearmotors</th>
<th>Motors</th>

4. Industrial gear units

- Helical gear units
- Helical-bevel gear units
- Planetary gear units

Products and systems covering several product groups

- Operator terminals
- MOVIPLC® drive-based control system

In addition to products and systems, SEW-EURODRIVE offers a comprehensive range of services. These include:

- Technical consulting
- Application software
- Seminars and training
- Extensive technical documentation
- International customer service

Visit our homepage at

→ www.sew-eurodrive.com

The website provides comprehensive information and services.
1.3 Additional documentation

Contents of this publication

This DRE Gearmotors catalog / price catalog includes the detailed technical data of the following SEW-EURODRIVE product groups:

- DRE helical gearmotors
- DRE parallel-shaft helical gearmotors
- DRE helical-bevel gearmotors
- DRE helical-worm gearmotors
- DRE Spiroplan® gearmotors

The price catalogs and catalogs offer the following information:

- Product descriptions
- Unit designations
- Project planning instructions for drives and gear units
- Visual representation of mounting positions
- Explanation on the order information
- Design and operating notes
- Important information about tables and dimension sheets
- Description of the different types
- Overview of all permitted combinations
- Selection tables for DRE gearmotors
- Dimension sheet for DRE gearmotors
- Technical Data
- Price catalog → prices and option pricing of options and accessories

Additional documentation

The "DR AC Motors" catalog/price catalog is available from SEW-EURODRIVE in addition to this "DRE Gearmotors" catalog/price catalog.

This catalog/price catalog contains the following information:

- Unit designations
- Product descriptions
- Project planning instructions for DR series AC motors
- Technical data of DR series AC motors
- Technical data of options and additional features
- Information about the dimension sheets
- Dimension sheets for DR AC motors
- Information on brakes from SEW-EURODRIVE
- Information on prefabricated cables
- Price catalog → prices and option pricing of options and accessories

Please note that the complete range of technical documentation is available on our home page:

→ www.sew-eurodrive.com
