ECDriveS® drive system
for light load conveyor technology

ECDriveS®

The new drive system for light load conveyor technology

ECDriveS® technically stands for **E**lectronically **C**ommutated **D**rive **S**ystem, a brushless DC gear-motor. However, ECDriveS® also stands for “easy drive” – the simple, efficient and cost-cutting drive solution for roller conveyors from SEW-EURODRIVE.

ECDriveS® is straightforward: plug it in – ready – that’s what “easy drive” means

- DC drives – optimized for the lower power range of roller conveyors in light load conveyor technology
- Simple handling
- High degree of flexibility
- Simple integration and startup
- Impressive endurance and durability in operation

The ECDriveS® drive system is therefore the perfect addition to our broad product portfolio of standard gearmotors, motor starters and decentralized drives for intralogistics in the lower power range.

Overview of ECDriveS®

- Brushless DC gearmotor that is directly integrated into the roller conveyor and is also universally usable
- External commutation electronics with ethernet-based zone controls or binary control. Ethernet controls feature integrated conveyor logistics that can provide both conveying with zero pressure and decentralized solutions for a wide range of other conveying tasks
- 250% overload capacity at 40 W S1 power rating
- Optimized gear unit construction for a long service life, even at high capacity utilization
- Precise positioning of the material to be conveyed thanks to integrated encoder
